International Marketing Management and Organization is a two-year, English-taught Master of Science (Laurea Magistrale) that is designed to advance students' business education and provide a solid foundation for their career progression. The program combines academic rigor with exposure to business life.

Internationalization, innovation and sustainability are at the core of the program – both in terms of approach and study subjects. The curriculum will allow students to deep dive into the most compelling issues for today's internationalized firms: from cross-cultural negotiation to international management; from quality management to business process reengineering; from innovation management to international logistics.

The Master program extensively employs participatory learning processes such as analysis of case studies, team-based simulations, discussions with managers, project works on real problems of partner companies, company visits, and internships. Mobility experiences – both in Europe and in the rest of the World – are highly encouraged.

By the end of the Master program, students will be highly competitive in the contemporary job market because of their cutting-edge knowledge on specialized management topics and their skills developed on the field – from studying in a multi-cultural class to working on company projects.

### **Career and job opportunities**

Students will develop the skills and knowledge to hold middle- and top-management positions in international, innovative and sustainable companies. The program prepares students to work in functions such as marketing, human resource management, research and development, quality management and sustainability, as well as to work in business consulting practices, research centers, or to become an entrepreneur.

## **REQUIREMENTS FOR ADMISSION**

To be eligible for admission, students need to hold a BSc degree with a major in economics, business, management from an Italian or a foreign university; they also need to produce proof of English proficiency at level B2. A committee assesses enrolment applications.

Enrolment of students who are not EU-citizens and/or who hold a BSc from a foreign university is subject to specific regulation. Find more information here:
