

50 Years – Research for  
A Life Without Cancer

# DKFZ Summer Internship in Cancer Research

The DKFZ Summer Internship in Cancer Research is an 8-week program for outstanding and ambitious master students who are interested in gaining laboratory research experience. Students of the Summer Internship will have the opportunity to participate in cutting edge research in cancer-related biology, and to interact with leading scientists in the field as well as fellow students from around Europe. They will also take part in the Internship Core Course, which covers recent research at the DKFZ via a series of research seminars and will have the opportunity to take part in a soft-skills courses about topics related to scientific presenting and communication.

The DKFZ is the largest biomedical research institute in Germany and is a member of the Helmholtz Association of National Research Centers. The DKFZ, located in scenic Heidelberg, has more than 2,800 staff members, including approximately 850 scientists and 550 PhD students. Research at the DKFZ is committed to unraveling the causes and mechanisms of cancer development and, based on the new research findings, to develop novel strategies for the diagnosis, treatment, early detection, and prevention of cancer.

**Date:**

1st August - 30th September  
2016

**Deadline for online application:**

1st March 2016
